

## Constellations by IPextreme

### ABOUT CONSTELLATIONS

At IPextreme, we believe that a healthy semiconductor industry is best served by an IP ecosystem composed of many companies, large and small. To facilitate this, we have created **Constellations™**, a collective of independent, like-minded IP companies and industry partners that collaborate at both the marketing and engineering levels for mutual benefit—and, more importantly, for the benefit of our customers. IPextreme serves as the Constellations program coordinator, but is also a member on equal standing with all others.

Constellations companies pool our resources and energy to do more than we would otherwise be able to do on our own. Sharing a presence at large industry trade shows, for example, allows us to save time and money by working together to prepare for the show and splitting the cost on a pro rata basis. We are greater than the sum of our parts.

### CURRENT MEMBER COMPANIES

In addition to IPextreme, our current “stars” are as follows:
